RAS vs AlphaSense: a research library, or the whole research function

AlphaSense searches a premium library of business content. RAS fuses your documents, your data and cited external research into one board-ready, auditable artifact.

World #3
BIRD-Bench R-VES
text-to-SQL over your own data

Air-gapped
Deploy anywhere
SaaS, BYOC, on-prem or fully offline

10 probes
Adversarial review
red-teamed before you see it

2 sources
Minimum per claim
trust-scored, triangulated, cited

Side by side

CAPABILITY	ALPHASENSE	ADYA RAS
Core job	Search and summarise a premium library of business and financial content	Search, research, analyse and strategise, ending in one auditable artifact
Content	500M+ documents, 250K+ expert transcripts and broker research	Your document estate, the open web and sources you already license, all cited
Your documents	Enterprise Intelligence syncs SharePoint, Box, Drive and S3	Any format, including audio and video; knowledge graph and a gap radar
Your databases	Structured financial data and AI Excel modelling	Read-only text-to-SQL on your warehouse; World #3 on BIRD-Bench R-VES
Strategy output	Agents for primers, SWOT, landscapes; pitchbook slide drafts	SWOT, PESTEL, Five Forces, scenarios, each claim bound to an evidence graph
Verification	Citations link answers back to source documents	Two-source minimum, trust scoring; conflicts shown, not smoothed over
Review gate	Users check generated answers against the citations	Ten-probe red team: pass, revise or replan before you see it
Methodology	Custom agents and firm slide templates	Doctrine engine enforces house rules; ESM makes every artifact reproducible
Deployment	Cloud SaaS; private cloud and BYOK on Enterprise Intelligence	SaaS, BYOC, on-prem or fully air-gapped

Choose AlphaSense when
the job is searching its proprietary content: expert transcripts, broker research and filings.

Choose RAS when
answers must blend your documents and data, survive a board or regulator, and stay in-house.

AlphaSense details: public releases and 2026 reviews; verify current terms. RAS details: Adya.
